- a. Hardware Technology
- b. Software Technology
- c. Both a) and b)
- d. None of the above

Answer: c. Both a) and b)

4. The facts or raw material that are processed to obtain information are referred to as _____.

- a. Data
- b. Time
- c. Honesty
- d. None of the above

Answer: a. Data

5. ITeS is also called _____.

- a. Web – enabled Service
- b. Remote Service
- c. Both a) and b)
- d. None of the above

Answer: c. Both a) and b)

6. Information Technology improves the quality of service in _____.

- a. Business
- b. Organization
- c. School
- d. All of the above

Answer: d. All of the above

7. ITeS services provide a wide range of career options like _____.

- a. Web Services and Human Resources
- b. Geographical Information System
- c. Logistics Management
- d. All of the above

Answer: d. All of the above

8. The different areas where ICT is used _____.

- a. Banking & Insurance
- b. Education
- c. Health care and Agriculture
- d. All of the above

Answer: d. All of the above

9. B2B stands for _____.

- a. Business to Business
- b. Best to Business
- c. Business to Best
- d. Best to Best

Answer: a. Business to Business

10. Give the example of BPO services _____.

- a. Software Testing Services
- b. Legal Services and Content Writing
- c. Financial and Accounting Services
- d. All of the above

Answer: d. All of the above

- a. E-learning classrooms
- b. Smart-board presentations
- c. Video on experiments
- d. All of the above

Answer: d. All of the above

30. What role do teaching aids and media play in the classroom?

- a. Teachers can use pictures, animations and audio-visual
- b. Teachers can make lessons interesting using PowerPoint
- c. Teachers can use Learning based application
- d. All of the above

Answer: d. All of the above

31. Students can benefit by using LMS for example _____.

- a. Learn lessons anytime and anywhere
- b. Submit queries online
- c. Participate in the co-curricular activities
- d. All of the above

Answer: d. All of the above

32. ATM Stands for _____.

- a. Automated Teller Machines
- b. Automatic Teller Machines
- c. Auto Teller Machines
- d. None of the above

Answer: a. Automated Teller Machines

33. In a hospital, which computerised machine is used?

- a. ECG
- b. EEG
- c. CT Scan
- d. All of the above

Answer: d. All of the above

34. CAT stands for _____.

- a. Computer Access Tomography
- b. Computerised Axial Tomography
- c. Computer Axial Technology
- d. None of the above

Answer: b. Computerised Axial Tomography

35. MRI Stands for _____.

- a. Magnetic Resonance Imaging Machine
- b. Major Resource Imaging Machine
- c. Main Resonance Imaging Machine
- d. None of the above

Answer: a. Magnetic Resonance Imaging Machine

36. ECG Stands for _____.

- a. Electrocardiogram Machine
- b. Electricdiogram Machine
- c. Electrondiogram Machine
- d. None of the above

Answer: a. Electrocardiogram Machine

37. Three-dimensional (3D) pictures of various bodily parts can be created using a _____ machine. These photos are important in disease diagnosis.

- a. Computerized Axial Tomography Machine
- b. Magnetic Resonance Imaging Machine
- c. Electrocardiogram Machine
- d. Cardiac Screening Machine

Answer: a. Computerized Axial Tomography Machine

38. _____ uses high magnetic fields and radio waves to create a computerised image of the organs inside the body.

- a. Computerized Axial Tomography Machine
- b. Magnetic Resonance Imaging Machine
- c. Electrocardiogram Machine
- d. Cardiac Screening Machine

Answer: b. Magnetic Resonance Imaging Machine

39. _____ machine is used to monitor the heartbeat.

- a. Computerized Axial Tomography Machine
- b. Magnetic Resonance Imaging Machine
- c. Electrocardiogram Machine
- d. Cardiac Screening Machine

Answer: c. Electrocardiogram Machine

40. The _____ machine shows the physiology of the heart as well as the motions within it.

- a. Computerized Axial Tomography Machine
- b. Magnetic Resonance Imaging Machine
- c. Electrocardiogram Machine
- d. Cardiac Screening Machine

Answer: d. Cardiac Screening Machine

41. The brain's activity are recorded using a _____ machine.

- a. Computerized Axial Tomography Machine
- b. Magnetic Resonance Imaging Machine
- c. Electrocardiogram Machine
- d. Electro-encephalography Machine

Answer: d. Electro-encephalography Machine

42. In a diagnosis center, what high-tech machines are used?

- a. Computerised Axial Tomography Machine (CAT)
- b. Magnetic Resonance Imaging Machine (MRI)
- c. Electrocardiogram Machine (ECG)
- d. All of the above

Answer: d. All of the above
