

Electronic Spreadsheet Class 9 MCQ

PART B - SUBJECT-SPECIFIC SKILLS | UNIT 04 ELECTRONIC SPREADSHEET | MCQS

Source: <https://cbse skilled education.com/electronic-spreadsheet-class-9-mcq/>

Electronic Spreadsheet Class 9 MCQ helps students practice important objective questions based on spreadsheet concepts, formulas, functions, data entry, and basic calculations. These MCQs are useful for revision, skill development, and exam preparation.

1. LibreOffice Calc is used to perform the _____ activities.

- a. Tabulation of data
- b. Simple mathematical calculations
- c. Arranging data in ascending and descending order
- d. All of the above

Answer: d. All of the above

2. Calc is the spreadsheet application of _____ suite.

- a. Microsoft Office
- b. LibreOffice
- c. Both a) and b)
- d. None of the above

Answer: b. LibreOffice

3. After installing _____ operating System, by default LibreOffice gets installed.

- a. Windows 10
- b. MacOS
- c. Ubuntu
- d. All of the above

Answer: c. Ubuntu

4. Menu bar is located just below the _____.

- a. Title Bar
- b. Standard Toolbar
- c. Formula Bar
- d. Formatting Toolbar

Answer: a. Title Bar

5. By default, the Calc displays the Standard and Formatting toolbars at the top of the workspace. These toolbar provide a wide range of common commands and functions. Placing the mouse cursor over any icon displays a small box called a _____.

- a. Toolmenu
- b. Tooltip
- c. Toolbar
- d. None of the above

Answer: b. Tooltip

6. When the mouse pointer is placed over a cell, it is selected and ready to receive data from the user. This selected or activated cell is called as _____.

- a. Inactive Cell
- b. Active Cell
- c. No Cell
- d. None of the above

Answer: b. Active Cell

7. When we are selecting multiple columns in a spreadsheet it is called _____.

- a. Column range
- b. Row range
- c. Cell range
- d. None of the above

Answer: a. Column range

8. When we are selecting multiple rows in a spreadsheet it is called _____.

- a. Column range
- b. Row range
- c. Cell range
- d. None of the above

Answer: b. Row range

9. The _____ is used to select more than one 'range of cells' in a worksheet.

- a. Alter key
- b. Shift key
- c. Control key
- d. Enter key

Answer: c. Control key

10. Label text is the text entered by using a keyboard. It may combine with _____.

- a. Letters
- b. Numbers
- c. Special Symbols
- d. All of the above

Answer: d. All of the above

11. Any expression that begins with _____ is treated as a formula.

- a. =
- b. \$
- c. #
- d. %

Answer: a. =

12. In the expression, the _____ followed by values, cell address and functions are called as formula.

- a. =
- b. \$
- c. #
- d. %

Answer: a. =

13. The results obtained from a formula always get updated _____ when the values of these cells mentioned in the formula change.

- a. Manually
- b. Automatically
- c. Some time
- d. Never

Answer: b. Automatically

14. To calculate the total no of cells from A1 to A5, Which formula you will use.

- a. =A1+A2+A3+A4+A5
- b. =sum(A1:A5)
- c. Both a) and b)
- d. None of the above

Answer: c. Both a) and b)

15. To find the average of the cells from A1 to A5, Which formula you will use.

- a. =(A1+A2+A3+A4+A5)/5
- b. =average(A1:A5)
- c. Both a) and b)
- d. None of the above

Answer: c. Both a) and b)

16. To find the maximum value from the cells A1 to A5, Which formula you will use.

- a. =maximum(A1;A5)
- b. =max(A1;A5)
- c. Both a) and b)
- d. None of the above

Answer: b. =max(A1;A5)

17. To find the minimum value from the cell A1 to A5, Which formula you will use.

- a. =minimum(A1;A5)
- b. =min(A1;A5)
- c. Both a) and b)
- d. None of the above

Answer: b. =min(A1;A5)

18. To count the total no of cells from A1 to A5, Which formula you will use.

- a. =countblank(A1;A5)
- b. =count(A1;A5)
- c. Both a) and b)
- d. None of the above

Answer: b. =count(A1;A5)

19. You can open this Format Cell dialog box by pressing the shortcut key _____.

- a. Ctrl + I
- b. Ctrl + F
- c. Ctrl + P
- d. Ctrl + D

Answer: a. Ctrl + I

20. In the spreadsheet which numerical value is not allowed in the starting?

- a. 1
- b. 0
- c. 5
- d. 2

Answer: b. 0

21. The date format in a spreadsheet is set to _____ by default.

- a. yyyy-dd-mm
- b. dd-yyyy-mm
- c. mm-dd-yyyy
- d. dd-mm-yyyy

Answer: c. mm-dd-yyyy

22. How many types of alignment are there in an electronic spreadsheet.

- a. 3 (left, right, center)
- b. 4 (left, right, center, justify)
- c. 5 (left, right, center, top, bottom)
- d. 2 (left, right)

Answer: a. 3 (left, right, center)

23. Shortcut key for copy in an electronic spreadsheet.

- a. Ctrl + C
- b. Ctrl + X
- c. Ctrl + V
- d. None of the above

Answer: a. Ctrl + C

24. Shortcut key for cut in an electronic spreadsheet.

- a. Ctrl + C
- b. Ctrl + X
- c. Ctrl + V
- d. None of the above

Answer: b. Ctrl + X

25. Shortcut key for paste in an electronic spreadsheet.

- a. Ctrl + C
- b. Ctrl + X
- c. Ctrl + V
- d. None of the above

Answer: c. Ctrl + V

26. The small black square in the bottom-right corner of the selected cell or range is called a _____.

- a. Fill content
- b. Fill handle
- c. Fill document
- d. None of the above

Answer: b. Fill handle

27. Which one is a correct referencing in a spreadsheet.

- a. Relative referencing
- b. Mixed referencing
- c. Absolute referencing
- d. All of the above

Answer: d. All of the above

28. _____ is the way to refer the formula or function from one cell to the next cell along the row or column.

- a. Referencing
- b. Address
- c. Link
- d. None of the above

Answer: a. Referencing

29. When you drag any formula in any row or column in any direction, the formula gets copied in the new cell this is known as _____.

- a. Mixed reference
- b. Relative reference
- c. Absolute reference
- d. All of the above

Answer: b. Relative reference

30. In _____, a \$ symbol is used before the column name as well as row number to make it constant in any formula.

- a. Mixed reference
- b. Relative reference
- c. Absolute reference
- d. All of the above

Answer: c. Absolute reference

31. You can easily comprehend, compare, analyze or present data in spreadsheets using _____.

- a. Formula
- b. Chart
- c. Filter
- d. None of the above

Answer: b. Chart

32. Choose the correction example of the chart in the spreadsheet.

- a. Column Chart
- b. Bar Chart
- c. Line Chart
- d. All of the above

Answer: d. All of the above

33. Which of the following technique can be used to allow only date value in cell?

- a. Data formatting
- b. Data sorting
- c. Data filtering
- d. Data validation

Answer: d. Data validation

34. Which of the following Calc features allows us to replace multiple occurrences of a word?

- a. Delete formatting
- b. Delete all
- c. Delete formula
- d. Delete me

Answer: b. Delete all

35. We can replace multiple occurrences of a word using which of the following facilities of Calc?

- a. Find and replace
- b. By replace only
- c. By copy command
- d. By preview command

Answer: a. Find and replace

36. What is the name of the mechanism that organizes data in a specific order?

- a. Sorting
- b. Searching
- c. Filtering
- d. Validating

Answer: a. Sorting

37. What is the name of the mechanism that filters out irrelevant information?

- a. Sorting
- b. Searching
- c. Filtering
- d. Validating

Answer: c. Filtering

38. Which of the following types of packages does Calc refer to?

- a. Spreadsheet
- b. Double sheet
- c. Multi-sheet
- d. Cannot determine

Answer: a. Spreadsheet

39. Which of the following is an extension of a Calc worksheet?

- a. .ods
- b. .odd
- c. .xls
- d. .obj

Answer: a. .ods

40. How can one calculate the total of values entered in a worksheet column of?

- a. By manual entry
- b. By auto-sum
- c. Without formula
- d. By sum function

Answer: b. By auto-sum

**41. What happens if we move a cell carrying a formula that refers to another cell in the worksheet?
What happens to the cell numbers in the formula?**

- a. The cell row and columns are changed at destination.
- b. The cell row change at destination.
- c. The cell columns are changed at destination.
- d. No change will occur.

Answer: a. The cell row and columns are changed at destination.

42. How do you enter a function in Calc correctly?

- a. Directly typing function name in a cell
- b. Using function wizard or selecting from toolbar
- c. Both (a) and (b)
- d. Depends on the function

Answer: b. Using function wizard or selecting from toolbar

43. A function should start with_____.

- a. '=' sign
- b. alphabets
- c. numbers
- d. All of the these

Answer: a. '=' sign

44. A chart is printed using which of the following options?

- a. Insert → Chart
- b. File → View
- c. File → Print
- d. View → Chart

Answer: c. File → Print

45. How many axes do Calc charts have?

- a. Two
- b. Three
- c. Two or three
- d. Four

Answer: a. Two

46. In _____, you can see a preview of the chart.

- a. Page preview
- b. Chart preview
- c. Export chart
- d. All of these

Answer: a. Page preview

47. The column immediately next to column "Z" is _____.

- a. The column immediately next to column "Z" is AA
- b. The column immediately next to column "Z" is A
- c. The column immediately next to column "Z" is AZ
- d. None of the above

Answer: a. The column immediately next to column "Z" is AA

48. The default extension of a workbook created using a LibreOffice Calc spreadsheet is _____.

- a. .odf
- b. .ods
- c. .mdf
- d. .xls

Answer: b. .ods

49. The spreadsheet feature used to continue the series is called as _____.

- a. Auto Handle
- b. Fill Handle
- c. Type Handle
- d. None of the above

Answer: b. Fill Handle

50. The formula " =MIN(C1:C5)" stored in cell C6 when copied to cell D6 changes to _____.

- a. Row only
- b. Column only
- c. Row and Column
- d. None of the above

Answer: c. Row and Column

51. The formula in cell A2 is =B2+C3. On copying this formula to cell C2, C2 will change to _____.

- a. = B1 +C2
- b. = B1 + C4
- c. = D2 + E3
- d. None of the above

Answer: c. = D2 + E3

52. The cell address of the cell formed by the intersection of the ninth column and the eighth row will be _____.

- a. 81
- b. 19
- c. 18
- d. 17

Answer: b. 19

53. \$A1\$B2 is an example of _____ referencing in spreadsheet software.

- a. Absolute referencing
- b. Mixed referencing
- c. Relative referencing
- d. None of the above

Answer: d. None of the above

54. Numbers entered into a cell are automatically _____ aligned.

- a. Right align
- b. Center align
- c. Left align
- d. None of the above

Answer: a. Right align

55. If A1:A5 contain the numbers 16, 10, 3, 25 and 6 then =Average(A1:A5;60) will display_____.

- a. 10
- b. 20
- c. 30
- d. 40

Answer: b. 20

56. In _____referencing, the reference changes rows and columns automatically when it is copied to a new cell.

- a. Absolute referencing
- b. Mixed referencing
- c. Relative referencing
- d. None of the above

Answer: c. Relative referencing
